

Rare Skin Disorders

Residents and Specialists Course | 19-21 December 2024 | Paris, France

Course description

Rare skin diseases consist, in the majority of cases, of genodermatoses. The course program is made to provide participants with a comprehensive understanding of the pathophysiology, diagnosis, and management of these conditions, highlighting the journey from historical perspectives to cutting-edge advancements.

Learning Objectives

1. Evaluate traditional and modern diagnostic techniques used to identify rare skin disorders.
2. Analyse the historical progression of knowledge regarding genodermatoses.
3. Asses the evolution of treatment strategies from conventional therapies to cutting-edge interventions.

Faculty

Chair: Christine Bodemer
